**WINDING
TECHNOLOGIES**

Electrical and Mechanical Engineering Company

SABS
ISO 9001

THE COMPANY

Winding Technologies is an Electrical and Mechanical Engineering company with our head offices based in Wadeville Germiston South Africa. The company was established in 1994 as an armature winding company servicing the Mining Sector on AC/DC motors, and later expanded into Transformers, Substations, Switchgear, automation etc.. We have branches in Rustenburg, Limpopo Thohoyandou, Mpumalanga, Durban, Kimberly and Cape Town. Winding Technologies is 100% BWO (Black Woman Owned) with CIDB (Construction Industry Development Board) gradings of 8ME, 8EP.

BUSINESS PROFILE 2025

VISION STATEMENT

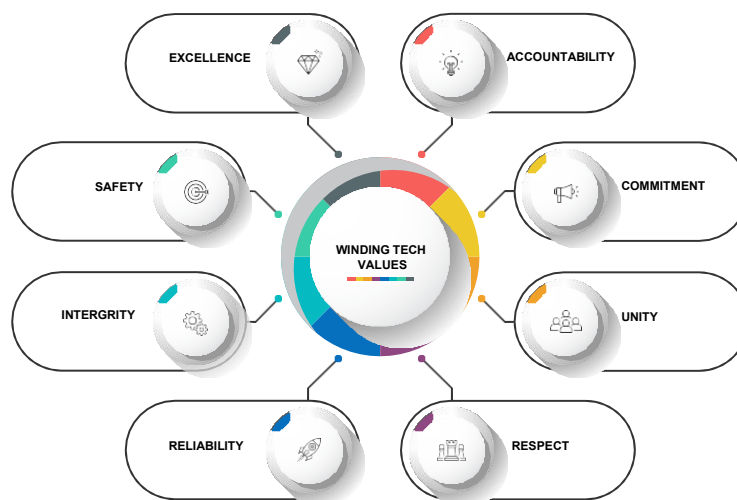

To be a leading expert and first choice service provider in the Electrical and Mechanical Engineering industry, aiming at timely delivery of outstanding quality and efficient service that exceeds industry standards norms.

MISSION STATEMENT

To meet and exceed our customer expectations by delivering quality, timely professional services and repairs, which adds significant benefit to our customers and provide fair reward to the members and staff, thereby ensuring continued growth and prosperity.

VALUES

QUALITY MANAGEMENT

- We are **SABS ISO 9001** Certified, and we continue to maintain the quality management system.
- We are ISO/IEC/SANS 80079-34:2018
- We are MTEX Q MARK as the Exd Product Repair Mark Scheme Certification which covers the relevant requirements of SANS:
- SANS60079-0
- SANS60079-1
- SANS60079-19

Fully computerised testing facility for Motors and Transformers;

Factory and office space in excess of 5000m²;

• Overhead cranes of 40ton combined capacity.
• Baking and burn-off ovens with calibrated temperature controls;
• Full range of transport with vehicle capacities totalling 19 tons;

SERVICES MOTORS

- Repair and supply of AC and DC electrical motors. (LV & MV)
- Minor and Major refurbishment of Electrical motors.
- Testing of AC and DC Motors

SUBSTATIONS

We install and maintain transmission & distribution substation primary and secondary equipment, i.e. Circuit breakers, disconnectors/isolators, transformers, CTs, VTs, Surge arrestors, protection panels, substation earthing, cables, conductors, Telecontrol panels, Quality of supply meters, batteries and battery chargers.

TRANSFORMERS

- We repair and maintain Distribution and Power transformers.
- We Supply new Distribution and Power transformers.
- Periodic and emergency Oil Sampling
- Oil results analysis and trending
- Transformer oil purification, on and offsite.
- Transformer Testing Services

SERVICES

AUTOMATION

We offer the following automation services:

- PLC, SCADA, SIMOCODE and Variable Speed Drive upgrades.
- Design and manufacturing of control panels.
- Design and manufacturing of PLC and RIO panels.
- Supply of instrumentation spares
- Configuration, installation and diagnosis of industrial networks.

MINI SUBSTATIONS

We supply and maintain the following:

- Enclosure Type A, B and C
- Up-to and including 2 000 kVA
- Customised units up to 33 kV for the African market
- 6mm standard high risk vandal proof Eskom approved minisubs

MECHANICAL SITE WORK

- Gearbox and Bearings (inspection, maintenance, repair, installation, oil sample and supply new bearings)
 - Hydraulic and pneumatic systems (Inspection of pilings and gauge, replace and install new pipes, repair and installation of cylinders)
 - Filters (inspection, maintenance installation and supply of new filters)
 - Winch (inspect, repair, installation and supply).
- We have the support of major manufacturers and we are able to offer solid technical support to our clients.

GENERATORS

We supply, install and maintain standby Generators up to 2000kVa.

SERVICES

SWITCHGEAR

We provide the following Services onsite and offsite:

- Repair of HV, MV and LV circuit breakers (Oil, SF6 and Air) up to 400kV.
- Pressure testing on HV, LV and MV circuit breakers.
- Ductor test on HV, LV and MV circuit breakers.
- Primary and secondary injection testing on protection relays.
- Installation, Testing and commissioning
- Time/condition-based maintenance.
- Supply of new switchgear

ELECTRICAL (CONSULTING)

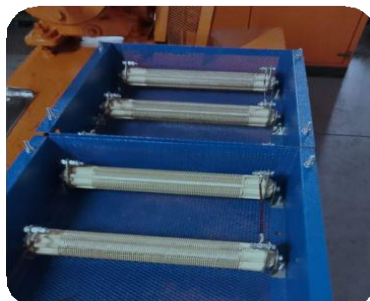

We also have an Electrical Consulting Department with well qualified Engineers and registered by ECSA.

We Design electrical drawings, prepare the specifications for the work presented and issue them to the client. We manage and supervise the work done on site by contractors to ensure that the work complies to the drawings and the specifications also adhering to the SANS regulations. We have worked with different clients including municipalities on contracts and work well with other professional engineers.

WIRE-WOUND RESISTOR

- We design and manufacture various sizes of wire-wound resistors.

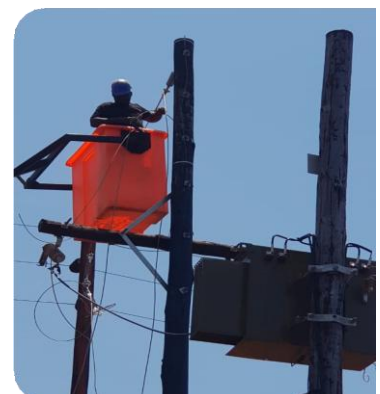

POWER LINES (ELECTRIFICATION)

We are equipped to do turnkey projects for power lines. We do feasibility studies, Environmental impact assessments (EIA), survey, detailed designs of HV, MV & LV power lines.

Construction and commissioning of power lines up to 275kV. We also have suitable equipment for the works, i.e. crane and bucket trucks, drilling machines, chain saws and other equipment for these works.

Vegetation management services.

We servitudes by cutting grass, bush and applying approved herbicides. Grass cutting, bush clearing and application.

PUMPS

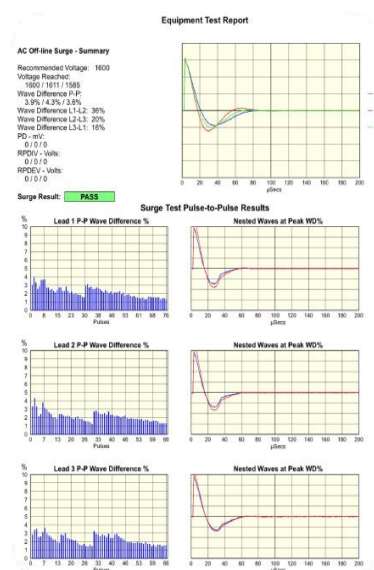

- We refurbish, repair, maintain, install and supply all types of pumps.
- We offer a broad range of pumps and related equipment which include:

FIELD SERVICES

Our services include the following:

- Commissioning and laser alignment
- Condition monitoring on site
- Offline motor efficiency testing
- Tan delta testing
- AC/DC motor Maintenance

VALVES

- Valves (repair, maintenance, installation and supply new Valves)
- Coupling and Shafts (inspection, maintenance, repair and installation) include:
